

Specialty PSV™ Etched

- Easy to use - just cut, weed, mask, and apply!
- Etch any surface without the use of harsh chemicals
- The most durable pressure-sensitive vinyl on the market, due to an acrylic based adhesive
- Free from cadmium - a heavy metal commonly found in sign vinyl
- All PSV with permanent adhesive are dishwasher safe after 24 hours - with no extra steps!

Acceptable Surfaces

Applies to most clean, dry, hard surfaces, such as metal, wood, glass, ceramic, acrylic, etc. Intended for the inside glass only on doors and windows. Not suggested for outdoor use.

Special Precautions

Not suitable for heat transfer. All PSV, excluding Chalkboard, are dishwasher safe after 24 hours of curing. Do not use abrasive cleaners or cloths to clean - use a soft cloth. Do not use with any other adhesive products. After installation, a haze may appear on the window - this is temporary and is caused by moisture. It will disappear after the film dries, which can take up to 30 days.

All PSV products, with the exception of Chalkboard, contain PVC and cannot be cut with a laser. PVC emits hazardous fumes when laser cut.

Outdoor Durability

Etched: Not recommended for outdoor use. Recommended for inside glass only and lasts 5 to 8 years

Sizing Available

12" x 15" sheets only

Quantities Available

Single Sheets & 10 Packs

Thickness

2mil Etch and Bubble Release: 2 mils
White, Blue, Green, and Red: 3.7 mils

45° Blade
Recommended

Perform a test cut. Cut this material in "right-reading". Be careful not to cut through the paper backing.

Use our AT-160, AT-160G or T&S Tape to transfer your design to a clean surface.

With the exclusion of Chalkboard, all are dishwasher safe after a 24 hour curing process.
