

FashionFlex® Heat-Sensitive

- Polyurethane film that changes to white when exposed to heat, such as your hand
- Dimensionally stable and very easy to cut and weed
- A full matte finish and very soft, similar to our ThermoFlex® Plus
- Comes on a slightly sticky carrier

Acceptable Fabrics

Cotton, Uncoated Polyester, and Fabric Blends
Excluding Nylon

Sizing Available

Available Widths (in.): 20" only
Available Lengths (ft.): 15' and 30' rolls

Special Precautions

Does not stretch. Store away from UV rays and heat. Store in opaque bag when not in use, otherwise a permanent color shift may occur.

Thickness

4.3 mils/110 microns

45° Blade Recommended

Cut this material in mirror image

300°F

Medium, even pressure

8-12 Seconds

Peel warm

Wash inside-out with cool water, tumble dry

Before Heat Exposure

After Heat Exposure

Test on dazzle cloth and other moisture-wicking polyesters. Moisture-wicking materials have better adhesion when washed and dried using no fabric softener or blotted with rubbing alcohol before pressing. Be advised that dye migration has occurred with low energy dyes in polyester and poly-blend fabrics. All technical information and recommendations are based on tests we believe to be reliable. However, we cannot guarantee performance for conditions not under manufacturer's control. Before using, please determine the suitability of product for its intended use. The user assumes all risk and liability, whatsoever, in connection with the use of this product. Seller's and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective by manufacturer.
