

HOW TO
sublimate
HEAT TRANSFER VINYL

Print the image you'd like to subliminate in reverse on sublimation paper.

Create a vector based cut file by tracing the outside of the image you want sublimated.

Cut out your sublimatable heat transfer vinyl with the vector in step 2.

sublimate after pressing on shirt

Press your HTV to the shirt. Press for less time than recommended-makes sure it's sticking.

Cut the sublimation paper along the edge. Use this to line up your image with your HTV & tape w/ Thermo Tape before press

Press at 375° F for 30 seconds. Remove sublimation paper and you're done!

sublimate before pressing on shirt

Remove HTV from carrier. Tape HTV on sublimation paper with ThermoTape, HTV side down. Press at 375° F for 30 seconds.

Once warm, remove the sublimation paper and ThermoTape.

Press your HTV according to material instructions.

What can be sublimated?

GlitterFlex® Ultra	DecoFilm®
GlitterFlex® Light	DecoFilm®
